

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it contains a valid OMB control number.

**SUPPLEMENTAL DECLARATION
FOR REISSUE
PATENT APPLICATION
TO CORRECT "ERRORS" STATEMENT
(37 CFR 1.175)**

Attorney Docket Number	HO-P01715US2
First Named Inventor	Boyd B. Moore
COMPLETE if known	
Application Number	10/675,906-Conf. #2934
Filing Date	September 30, 2003
Art Unit	2831
Examiner Name	A. R. Estrada

As legal representative of Boyd B. Moore, the deceased inventor of the referenced application, I hereby declare that:

Every error in the patent which was corrected in the present reissue application, and which is not covered by the prior oath(s) and/or declaration(s) submitted in this application, arose without any deceptive intention on the part of the applicant.

This reissue is a broadening reissue. The reissue is broadened to the extent that claims 25-33 are newly added by way of a preliminary amendment. Claims 25-33 of the reissue application are directed towards a conductive wire line made of a small diameter tubing having one or more optical fibers extending through the tubing in a helical configuration. The subject matter of claims 25-33 was not claimed under the issued claims of Patent No. 6,148,925. For example, Claim 1 of the issued Patent No. 6,148,925 recites "a method for inserting at least one conductor into an elongated length of metal coiled tubing, comprising the steps of: (a) placing the coiled tubing in a substantially vertical passageway; (b) inserting said conductor into the tubing, the leading end of the conductor including an elongated weight connected to the conductor, which weight is heavy enough to straighten the conductor enough to fall through the tubing, the weight having essentially no stiffness so that it is flexible enough to move through bends or irregularities in the tubing; (c) allowing the conductor and weight to fall by gravity through the tubing, which has a sufficient helical pitch providing a hold-up force due to friction for preventing the conductor from breaking, until the desired length of conductor is inserted in the tubing; and (d) removing the tubing with the conductor inside the tubing from the passageway and winding the tubing on a reel."

WARNING:

Petitioner/applicant is cautioned to avoid submitting personal information in documents filed in a patent application that may contribute to identity theft. Personal information such as social security numbers, bank account numbers, or credit card numbers (other than a check or credit card authorization form PTO-2038 submitted for payment purposes) is never required by the USPTO to support a petition or an application. If this type of personal information is included in documents submitted to the USPTO, petitioners/applicants should consider redacting such personal information from the documents before submitting them to the USPTO. Petitioner/applicant is advised that the record of a patent application is available to the public after publication of the application (unless a non-publication request in compliance with 37 CFR 1.213(a) is made in the application) or issuance of a patent. Furthermore, the record from an abandoned application may also be available to the public if the application is referenced in a published application or an issued patent (see 37 CFR 1.14). Checks and credit card authorization forms PTO-2038 submitted for payment purposes are not retained in the application file and therefore are not publicly available.

I/We hereby declare that all statements made herein of my/our own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under 18 U.S.C. 1001 and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
